

# Privilege

Advantages, rewards, and/or benefits given to those in the dominant group without members of the dominant group asking for them

How can I receive advantages and not know it?

# Intersectionality

Describes the way identities and systems of power, such as race, class, and gender, interact and influence oppression

Our identities and membership in dominant or non-dominant groups does not exist in a vacuum. They intersect and influence our experiences. We have multiple privileges and/or multiple oppressions.

## Oppression:

the systemic and pervasive subjugation or discrimination of non-dominant social groups, creating social inequity at all levels of society

Individual

Believing stereotypes  
Thinking it is acceptable to discriminate against Muslims

Interpersonal

Not hiring a woman  
Assaulting someone because she's wearing a hijab

Institutional/Structural

Policy allowing housing discrimination against transgender people  
Banning people from predominantly Muslim countries from entering the US

Ideological/Cultural

Social belief that being LGBTQ+ is unnatural  
Social belief that all Muslims are terrorists
